Profile

I'm a full stack MERN developer with over 5 years experience. I've worked as a Lead Mobile Engineer at startups and I've also built and published apps as a freelance developer. I love Typescript.

Employment History

Full Stack Engineera, Path, Miami (Remote)

SEPTEMBER 2023 — PRESENT

- Employed as a full stack engineer to build a web-based AI learning platform
- Built a Skills Trainer feature that allows users to create courses leveraging OpenAI's API and GPT-4 language model
- Developed the course audio feature that allows users to listen to course content using OpenAI's text-to-speech API

Solo Mobile Engineer, Casuarina (Freelance), Bridgetown, Barbados

OCTOBER 2022 — FEBRUARY 2024

Independently developed a feature-rich thrift shopping mobile app

- Frontend: React Native for seamless cross-platform experience
- Backend: Nest.js for efficient API development and resource management
- Database: MongoDB for flexible and reliable data storage

Implemented impressive features

- Global domain deep linking for easy sharing and access to products/sellers
- Notification system to keep users informed about updates and changes
- Favoriting system for personalized product and seller curation
- Cart system for streamlined purchasing process
- Seller rating and review system to foster trust and transparency

Lead Mobile Engineer, Seventh Ave, Remote

MARCH 2021 — MARCH 2023

- Built audio/video experience feature, allowing users to create/join virtual rooms and have live conversations
- Designed and built socket server to handle live room events such as muting, moderator controls, and participant management
- Developed feed components for sharing posts, images, and videos, including like and save functionality
- Built the question and answer feature (frontend). This feature allows a user to post a question in the app anonymously and have other users answer that question with either text, audio or video.
- Built the group chat feature (frontend and backend).This feature allows users in an online space/community to send messages, images, videos, links and gifs to other participants in the space.

Founder - Solo Engineer, Merchive, Bridgetown, Barbados

SEPTEMBER 2019 — PRESENT

- Built an ecommerce platform using Next.JS
- Built customer to owner messaging system using Express JS
- Built messaging caching layer using Redis
- Deployed to GCP using Kubernetes
